The aim of the cards is for ākonga to develop awareness of sharing information online

How to use the cards

- Shuffle and place cards face up, discuss if these are "OK, Risky or Never" to share.
- Separate the cards into 3 piles – OK, Risky, Never
- Turn them over and see which cards are correct

Cyber Skills Aotearoa

Your online name doesn't identify you unless it's completely unique. Be careful to make sure it's not linked to your real life identity.

OK to share

Cyber Skills Aotearoa

Your first name doesn't identify you unless it's completely unique. If you're not sure, consider using an online name instead.

OK to share

Cyber Skills Aotearoa

How do you know that the people you connect with or chat to online are really who they say they are?

Risky to share

Cyber Skills Aotearoa

Your hair colour is safe to share as so many other people will have the same hair colour as you.

OK to share

Hobbies and sports

Your country

The weather

Memes

Videos

Favourite music

Saying that you live in Aotearoa is not likely to enable someone to find you. Be aware that information can be combined though!

OK to share

Your sports and hobbies are great to share. But don't use them as part of any of your passwords, since they're easily found out.

OK to share

Memes are fun and usually not unique enough to identify you. Don't add personal details to them.

OK to share

Go for it! Share as much weather as you feel like!

OK to share

Share your taste in music! This won't identify you and won't give away your location. Don't use this as part of a password as it could be easily found out.

OK to share

Creating content can be fun, but think about what is being shown in the background. Could this identify you?

Risky to share

Pet's name

Home address

Banking PIN or password

Bank account number

Login and password

Personal ID

Sharing where you live allows people to find you. Only share with people and organisations you know and trust.

Never share

Your pet's name is not going to identify you, and won't give away your location. Don't use it as part of a password as it's often easy to find out!

OK to share

Your bank account number is okay to share with an employer or trusted friend to transfer you money.

Risky to share

Sharing your bank PIN or password is like giving away all your money!

Never share

Any legal document that can be used as proof of ID puts your identity at risk if you share it. Show people the photo in person!

Never share

Don't share your login and password with anyone.

Never share

Holiday location

Birthday

Geotagged photos

Mobile number

Check-in location

Email address

Dates of birth can be used to identify you. Your birthday (without the year) is probably fine. Remember that information can be combined to make you identifiable.

Risky to share

Holidays are great and fun. Do you really want to tell the world that your home is empty?

Risky to share

Your mobile number can be used to send unwanted messages, spam, or worse. Only share it with people you trust to not on-share.

Risky to share

Geotagged photos can be used to identify you and locate you. It's like "checking in" somewhere; use caution or at least post later, when you are not at the location.

Risky to share

Your email address may seem harmless to share, but it's often used as a login for websites. It's also really easy for software to find an email address for spam.

Risky to share

Checking in somewhere allows people to find your physical location. This sort of thing should only be shared with those you trust.

Risky to share

School name

Photos

Concert tickets

Cyber
Skills
Aotearoa

Photos can contain lots of clues about where you live, your physical location, and your movements. Be careful about what you choose to share.

Risky to share

Cyber
Skills
Aotearoa

Be careful as sharing the school you attend can help people find your location. Remember that information can be combined to make you identifiable.

A concert ticket can be used to locate you. If the barcode or QR code is visible, other people could copy it and go to the gig instead of you!
